Exemption certificates

Some patients have been requesting certificates to prove they are exempt from receiving the vaccine. There is currently no such thing as an exemption certificate/letter, or proof of antigen after infection.

Update around new AZ guidance

Any person under 40 in group 1-9 will now be offered Pfizer as their first dose. If they had AZ and have not had a clot with low platelets then they will be offered second dose as normal. Any person over 40 in groups 1-9 will be offered AZ. We are unable to give a choice of vaccines unless there is a clinical contraindication, as written in the green book. Please do reference this - we have had very strong guidance that we are expected to follow this with no deviation. Antony Clark from Here will be in touch if we have any queries regarding clots and your patients. Please reply promptly to any queries so we can cross-check with our first dose lists. This will avoid us having to turn people away who have had blood clots and we do not know if they had low platelets at the time. Thanks very much for your understanding.
